

Wymondham Medical Centre

Important Patient Information

From the 27th July 2010, if you are referred for treatment outside of the Practice, your referral will be shared with a special team we have developed in partnership with Practices across South Norfolk.

This team consists of clinicians who will have access to your referral information and will support our clinicians to get the best for you from the local NHS.

The Surgery's aim is to provide our patients with the most appropriate treatment in the shortest possible time.

All patient identifiable information will continue to be handled in accordance with the Data Protection Act and NHS confidentiality regulations.

If you have any questions, please raise them with Kevan Baker, the Practice Manager at Wymondham Medical Centre
